

PROTECTION WINDOW

WITH DOUBLE BIT LOCKS

- Low profile continuous hinge
- Overlapping cover for strength and increased gasket protection
- DB3 quarter turn lock (other key solutions on request)
- Large viewing area
- Transparent covers
- Integrated PUR gasket

IP 66

IK 09

-40°C

+120°C

With a secure low profile, continuous hinge design and sleek integrated quarter turn locks, the protection windows minimizes access to where security and safety are needed.

Sized at 340 x 300 x 90 mm and 450 x 400 x 90 mm. The Fibox PW series has the deepest working area and the largest viewing space available. The most important aspect of this product is it works with any underlying enclosure.

PROTECTION WINDOWS

Dimension	Symbol	Code	Description
340 x 300 x 90 mm	PW 343009T	4901824	With double bit locks
450 x 400 x 90 mm	PW 454009T	4901804	With double bit locks

The PW provides an easy to install, secure HMI access point to any enclosure or flat surface with its high ingress and impact protection IP66 and IK09.
